CRUSHING PRODUCT LINE

- Highway Stone Crushing
- Construction Waste Recycling
- Dolomite Crushing Process
- Quarry Crushing Machine
- Stone Crushing Equipment
- Rock Crushing Process
- Ballast Product Line
- Basalt Crushing
- Mining Mill Grinder
- Mining Equipment
- Mining Crusher
- Ore Grinder Crushing
- Kaolin Mining Process
- Quartzite Crushing Machine
- Sand Making Plants
- Grinding Mill / Grinder
- Cement Sandstone Crushing
- Sand Production Line
- Concrete Crushing
- Stone Crushing Machine
- Gypsum Mining Equipment
- Feldspar Mining
- Chrome ore mining
- Calcium carbonate crushing
- Bauxite ore mining
- Perlite Mining Machine
- Rare Earth Mine Crushing
- Lithium Ore Crushing plant

Construction Waste Recycling Solutions Project, Concrete Recycling, Slag Recycling

Construction waste really do harm to our life, how can we deal with them? As is known to all, construction waste includes gravel, concrete and other masonry material, so it is possible for us to reuse them. So SBM provides solution to construction waste process.

Construction Waste Solutions Project

For the construction waste process, we should choose the right materials that are usable and next is crushing. Construction waste is currently the world's only growing "gold." Shanghai SBM found this gold mine, the development of waste disposal for the construction of mobile crushing plant, bringing investment into a construction waste disposal industry users of the road. The earthquake generated by the transformation of construction waste from the recycling building materials, enough had built more than 8,000 farmers in sets of 100 square meters of housing. SBM Have many Construction Waste Recycling production station in more the 10 country of the world.

Construction Waste Recycling And Construction Waste Crusher

SBM launched a mobile crushing plant, which has many irreplaceable advantages. First of all construction waste piling more concentrated, handling on-site space is limited, selection of mobile crushing plant to resolve this problem, the device is equipped with wheels, the device can be broken at any time to enter the scene, the scene of the broken material, not the material be removed from the cost savings. And small footprint, you can always enter the broken scene. For construction waste, mobile crushing plant flexible configuration, according to the specific waste site, design modification, or special mobile crushing plant configuration, suitable for construction waste crushing.

SBM supplies the professional construction waste plant, including impact crusher, jaw crusher, cone crusher and mobile crusher. Of all these construction crushers, mobile crusher is the most convenient for Construction Waste Recycling. You know usually the construction waste is in city and to deal with them we should better use portable equipment. SBM have five series of mobile crusher: cone crusher series mobile crusher, jaw crusher series mobile crusher, impact crusher series mobile crusher, multi-crushing mobile crusher and crawler type mobile crusher. The first four mobile crushers are tyre type mobile crusher and crawler type mobile crusher is crane on-track and is our ultramodern newly designed mobile crusher.

Concrete Crusher and Concrete Crushing Equipment

Concrete is effectively an artificial stone or rock. It is used for making buildings, roads, bridges, vessels pipes etc. Concrete is a composite construction material that is composed of cement materials such as fly ash and slag cement, aggregate (generally a coarse aggregate made of gravels or crushed rocks such as limestone, or granite, plus a fine aggregate such as sand), water, and chemical admixtures.

In the procedure of concrete production, our concrete crushing equipment such as jaw crusher, cone crusher, impact crusher can be used to crush the slag cement, aggregate, limestone, granite into small pieces, then the concrete mill including ball mill, raymond mill, vertical roller mill to grinding them into powder styles to meet customer's different requirements.

Slag Crusher and Grinder

The slag is one of the Construction Waste. The slag can be recycled or reused. Slag can be used to make the cement raw materials, or sand material. With more and more widely Grinding mill, slag production line also will be more and more. Slag production line established to reduce a large part of the labor force, operating efficiency is greatly improved.

SBM is a famous manufacturer of Slag crusher in China, and supply all kinds of stone crushers, grinding mills and other mining machines. Now, our Slag crusher has been exported to some countries, such as USA, South Africa, Egypt, Mongolia, Germany, Russia etc. Of course, we not only supply Slag crusher, but also a series of installation and maintenance service. We hope make a deep cooperation with our customer, mutually beneficial and win-win together.
