### CRUSHING PRODUCT LINE

- Highway Stone Crushing
- Construction Waste Recycling
- Dolomite Crushing Process
- Quarry Crushing Machine
- Stone Crushing Equipment
- Rock Crushing Process
- Ballast Product Line
- Basalt Crushing
- Mining Mill Grinder
- Mining Equipment
- Mining Crusher
- Ore Grinder Crushing
- Kaolin Mining Process
- Quartzite Crushing Machine
- Sand Making Plants
- Grinding Mill / Grinder
- Cement Sandstone Crushing
- Sand Production Line
- Concrete Crushing
- Stone Crushing Machine
- Gypsum Mining Equipment
- Feldspar Mining
- Chrome ore mining
- Calcium carbonate crushing
- Bauxite ore mining
- Perlite Mining Machine
- Rare Earth Mine Crushing
- Lithium Ore Crushing plant

## Stone Crushing plant for Highway Construction

### Highway Construction introduction

The Highway construction promotes the economy's development fast, and it will directly pull fuel the need to stone crushing equipments. In the highway construction, the sandstone skeletal material is the most based and also the most extensively original material of the application, only the human sand making equipment can produce the sandstone materials that fit the standard of the country highway construction. Therefore, SBM crusher puts up the newest crushing and screening processing chart-VSI series of Vertical Shaft Impact Crusher to meet the need. The high-quality aggregate produced by this production line is widely used in road surface of many highways.

### High quality of SBM highway stone production plant

1. Our combined crushing and screening machines are reasonable combined with different crushers and have compacted special crossing distribution in their material processing flow design, so that they are small foot printed of fields, high quality in crushed products, low in quarry dust and they will give you high reward for your investment. Their advanced electric control panel can assure the whole process discharge smoothly, running reliable, operation easily and high efficiency in power consumption.
2. The quality of the product is very high. Content of needle plate type is no more than 5%. A quarry client in Saudi Arabia adopted Jaw Crusher and Impact Crusher equipment, but content of needle plate type is more than 10%, resulting in the bad sale of its product. After using VSI Series Vertical Shaft Impact Crushers, the content of needle plate type in the product is reduced to 4.7%.
3. Better design of the impellers reduce the resistance of materials, highlight passing through quantity of materials and crushing ratio, so the efficiency is raised by 30%-60% compared to traditional machines.
4. VSI series crusher can use in old production line reform to increase the sandstone quality, also can coordinate with the production line of high performance concrete(over C40) skeletal material or stone material developed by the company. These would push you to be the stone crushing production enterprise of technological precedence and best-value.

### The component of the highway stone production plant

SBM VSI crusher machine is the preferred equipment in the human sand making and stone shaping areas. Sand production line equipment including: Jaw crusher, Impact crusher or Cone crusher, sand making machine, vibrating screen. According to the sandstone material's need, it also can equip with vibrating feeder and sand washing machine, and perfect the whole series sandstone equipment.
