Mining equipment - Mining machinery

▶ Mining Equipment - Crusher

In the mining crushing process, we will used mining crushers including jaw crusher, impact crusher, spring cone crusher, symons cone crusher, hydraulic cone crusher, vertical shaft impact crusher, mobile crushers and so on.

▶ Mining Equipment - Mill

In the grinding process, mining mills are the most commonly used equipments. Such as ball mill, raymond mill, vertical roller mill, coarse powder mill, mtm medium speed trapezium grinding mill, super thin grinding mill, mtw trapezium grinding mill etc.

▶ Mining Equipment - Screen Process

Vibrating feeder, vibrating screen, sand washing machine and other equipments will be used widely in the screening process. During every process, some optional equipments including vibrating feeder, vibrating screen, belt conveyor, rotary tube drying machine, the permanent-magnetic roller separator, super-fine rotor style classifier, dust catcher and so on may be also used.

▶ Mining equipment - Mining machinery

Mining equipment is an important part of the mining machinery which is used widely in the mining industry. **Mining machinery** is used for extraction of minerals and rich selection of mechanical and other operations, mainly including exploration machinery, ore mining machinery and mineral processing machinery.

In the three processing of mineral processing flow sheet, our mining equipments are mainly used in the mineral processing machinery. According to the mineral processing flow sheet, mining process can be divided into crushing, screening process, grinding, classification process, sorting process and dehydration process and so on.
